PictureMate®
personal photo lab

PictureMate Snap
(PM 240)

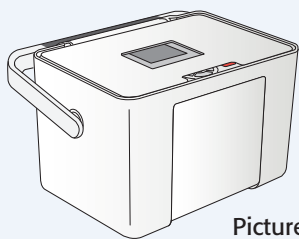

PictureMate Flash
(PM 280)

Follow these steps to set up your PictureMate® Snap or Flash and print—no computer required!

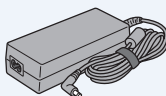

Note: PictureMate Snap is shown throughout, but the steps are the same for PictureMate Flash. To print from your computer, see the *Basics* book and your CD after completing these steps.

1 Unpack

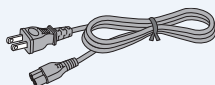

PictureMate comes with all these items in the box.

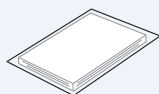

PictureMate

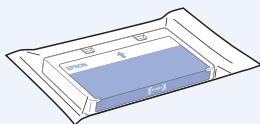

Power adapter

Power cable

PictureMate
photo paper

Initial PictureMate
photo cartridge

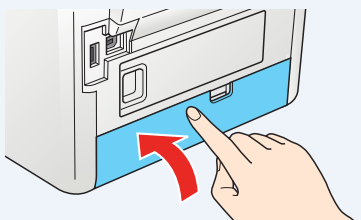

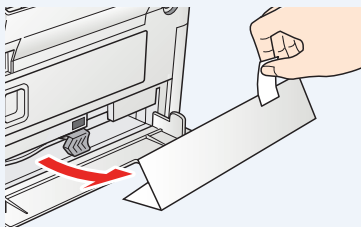

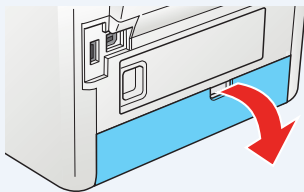

Basics book

Printer Software CD

- 1 Remove all the tape and packing material from the outside of PictureMate.
- 2 Open the cartridge door on the back of PictureMate.
- 3 Remove the packing material from inside the cartridge slot.
- 4 Close the cartridge door.

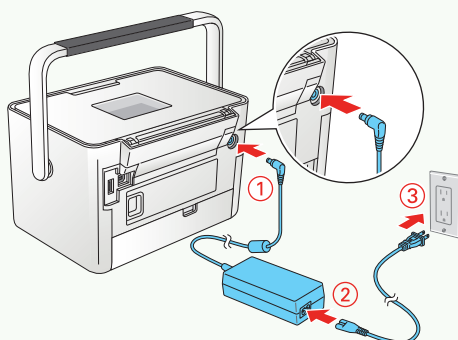

410693400

2 *Plug In and Turn On*

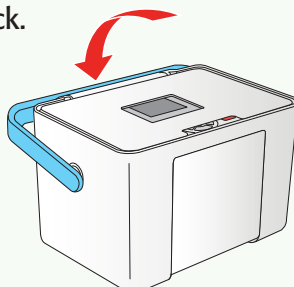

1 Connect the power adapter to the back of PictureMate.

2 Connect the power cable to the power adapter.

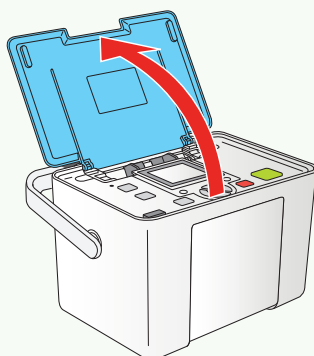

3 Plug the other end of the power cable into a power outlet.

4 Flip the handle to the back.

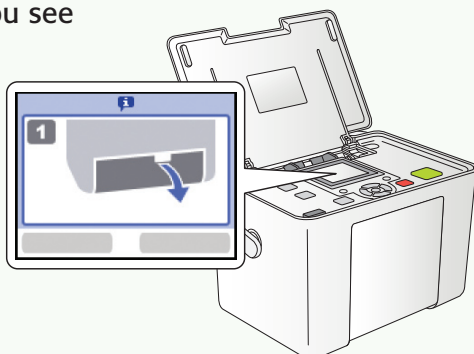

5 Open the paper support.

6 Press the I/⏻ On button to turn on PictureMate.

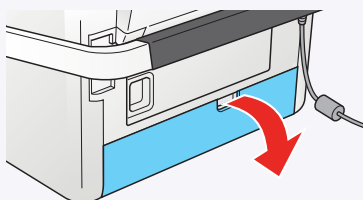

After a moment, you see this on the photo viewer screen:

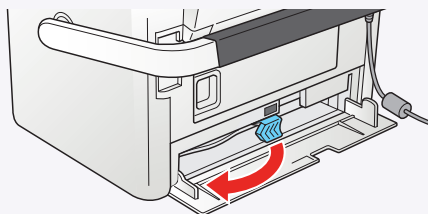

Now you can install your initial photo cartridge.

3 *Install the Initial Photo Cartridge*

1 Open the cartridge door.

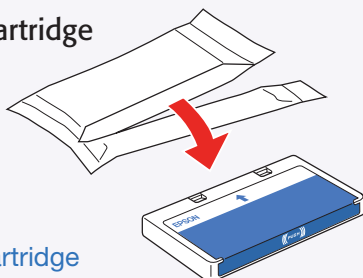

- 2** Slide the cartridge lever left to the **Release** position.

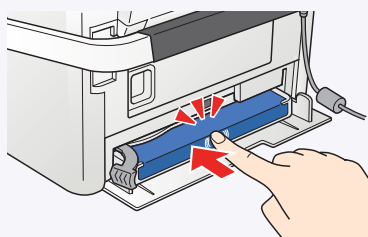

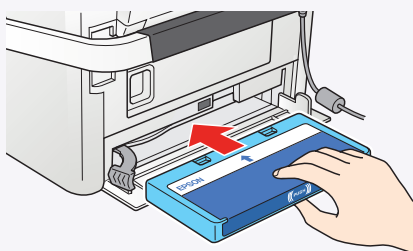

- 3** Remove the initial photo cartridge from its package.

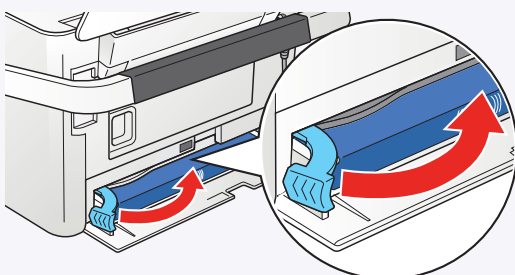

Caution: Do not install a different PictureMate cartridge for initial setup. Install only the initial photo cartridge that came with PictureMate.

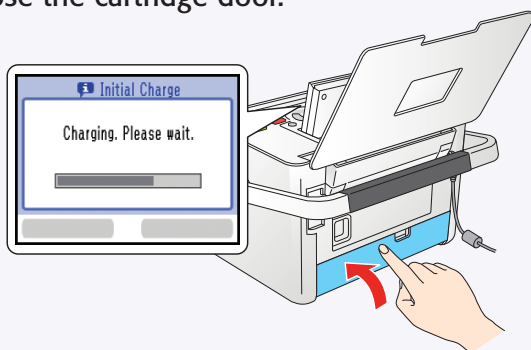

- 4** Slide the cartridge straight into the slot, label side up, until it clicks into place. It will not go in all the way.

- 5** Slide the lever all the way right, to the **Lock** position.

- 6** Close the cartridge door.

PictureMate charges the print head for 3 to 4 minutes and displays the screen above.

- 7** When you see the **Charging complete** message on the photo viewer screen, press **OK**.

Turn over...

4 Load Paper

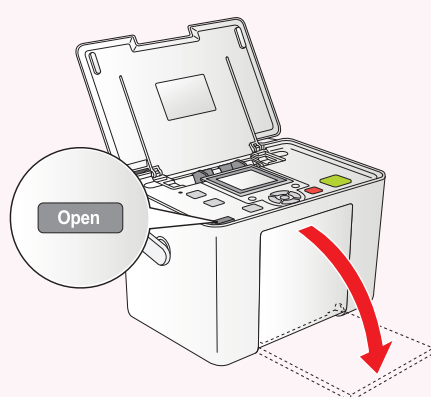

PictureMate comes with genuine Epson® glossy photo paper made especially for printing lab quality photos.

Caution: Don't load or print on plain paper; this may damage PictureMate.

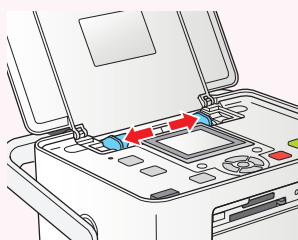

- 1 Move the handle to the back and open the paper support, if necessary.

- 2 Press the **Open** button to open the output tray.

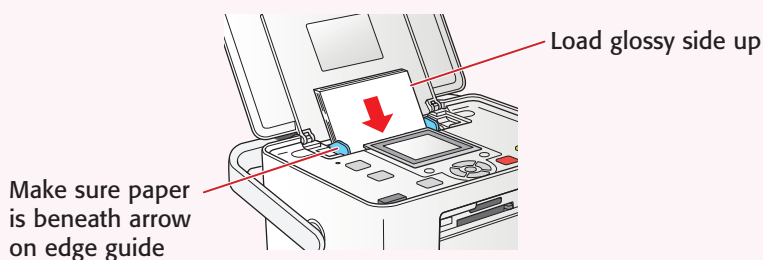

- 3 Slide the edge guides outward.

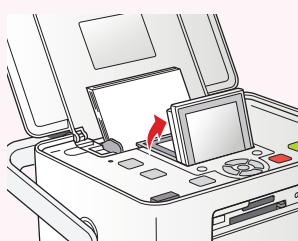

- 4 Load up to 20 sheets at a time. Fan the sheets to slightly separate them.

- 5 Place your paper into the slot between the edge guides with the glossy side up. Slide the edge guides inward slightly.

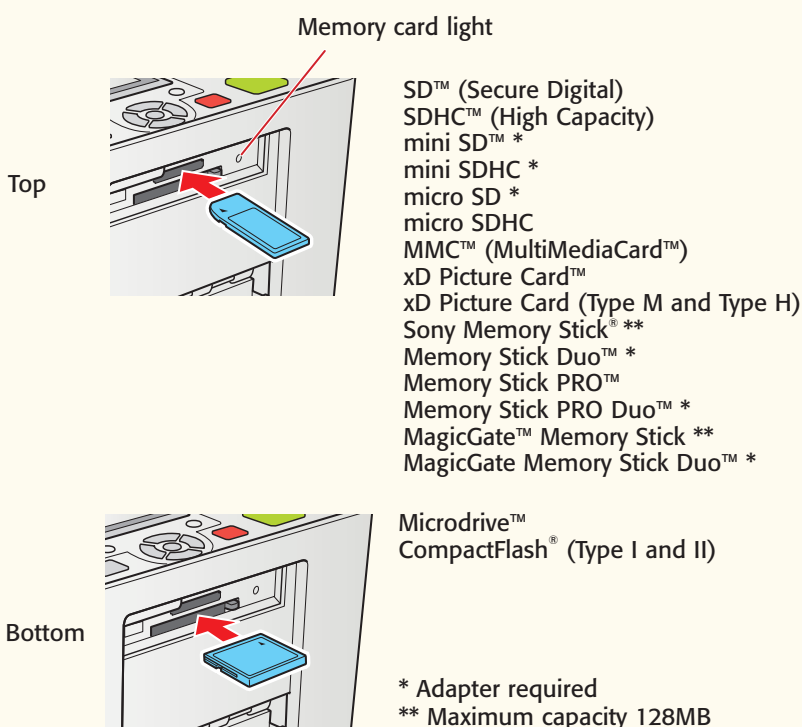

- 6 Raise the photo viewer screen.

Note: Keep unused paper in the original package and store it flat to prevent curling.

5 *Insert a Memory Card*

- 1 Remove the memory card containing photos from your digital camera.
- 2 Insert your memory card into the correct slot on PictureMate.

- 3 Push the card in until it stops (it won't go in all the way). The memory card light comes on and PictureMate tells you how many photos are on the card.

Note: Insert just one card at a time. PictureMate does not read multiple cards at once.

6 *Print Your Photos*

PictureMate's photo viewer screen makes it easy to select the photos you want to print.

Select Some Photos

- 1 Press ◀ or ▶ to view your photos.
- 2 Press **OK** to select a photo for printing.
- 3 To print more than one copy, press **OK** to increase the number. Press the **Copy** - selection button to decrease it. (The Copy - selection button is the left button beneath the photo viewer screen.)
- 4 To select more photos, press ◀ or ▶ to view the photo and press **OK** to select it. Repeat step 3 to select more copies, if necessary.
- 5 Continue with "Print Selected Photos" to the right.

Select All Photos

- 1 Press the **Select All** selection button. (The Select All selection button is the left button beneath the photo viewer screen.)
- 2 To print more than one copy of all the photos, press **OK** to increase the number. Press the **Copy -** selection button to decrease it.
- 3 Press **Proceed**.
- 4 To change the number of copies of an individual photo, press ◀ or ▶ to select the photo. Then press **OK** to increase the number, or **Copy -** to decrease it.
- 5 Continue with "Print Selected Photos" below.

Print Selected Photos

- 1 Press the **Print Preview** selection button and use ◀ or ▶ to review your selected photos.
- 2 Press **Layout** to select the layout of your photos on the paper.
- 3 Press  **Print** to print your photos.

More on PictureMate

Check your printed manual

See the *Basics* book for instructions on printing from PictureMate, your computer, and other devices. Also learn how to save photos to or print photos from a CD, replace your Print Pack (photo paper and photo cartridge), take care of PictureMate, and solve problems.

Check your on-screen manual

After you install your PictureMate software from the CD, you'll see an icon for your on-screen **PictureMate User's Guide** on your computer screen. Double-click that icon for comprehensive instructions on using PictureMate and its software.

Note: For information on possible software updates for PictureMate, go to <http://support.epson.com>, select **Printers**, and select your product under **Personal Photo Lab**. Then check for updated software in the **Drivers & Downloads** section.

Caution: To avoid damaging your PictureMate, keep it out of the sun and don't leave it in your car or other location where it can get too hot or too cold.
